The Future is today...in card reader technology!

the  
**Passport**  
**360**  
**NEW** Reader System

Information inside

# Passport 360™ the NEW Card Reader System from

## The Future is Today

The new and improved Passport 360 has the brains to control, and the flexibility to satisfy, any requirement. This improvement in Card Reader Technology brings you all the features of the Passport Plus with added programming capability. Let's take a look at some of the features.

## Featured Benefits:

- Central Access and Stand-Alone Operation.
- ScanNet® or Palm™ Handheld via infrared interface programming.
- Over 100,000 ID numbers are available for Transaction and Information Storage.
- Time Zones: Program up to 16 Time Zones. Control ID access by days of the week and time period.
- Groups: Assign up to 16 groups. Assign ID numbers to different Time Zones.
- Facility Codes: Assign up to 999 codes for different facility location areas.

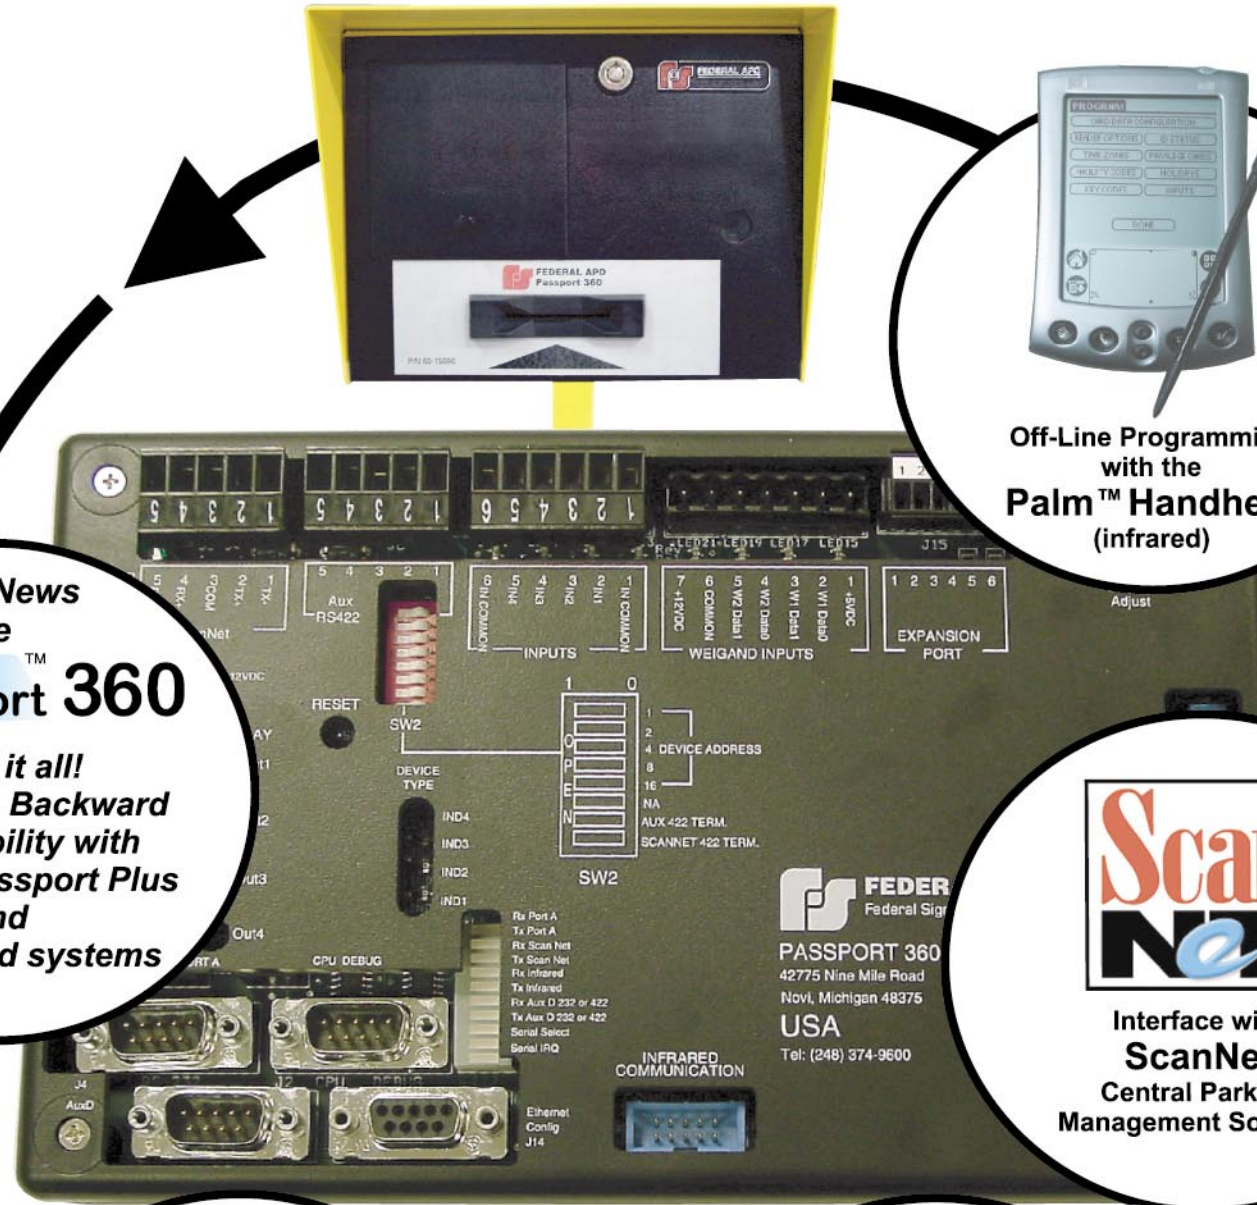

## Flexible and User-friendly Operation:

The Passport 360 features are flexible and user-friendly for all your access facility management requirements. As a systems integrator we focus on a complete solution that work together to deliver a true systems approach to parking.

Good News the **Passport 360™**

*Does it all!*  
Along with Backward compatibility with existing Passport Plus and Host-based systems

## In card reader technology!

Advancement in Reader Card technology is just the beginning. Federal APD is constantly improving our Access System Solutions. As a leader and provider of parking equipment, our success depends on it.

Off-Line Programming with the Palm™ Handheld (infrared)

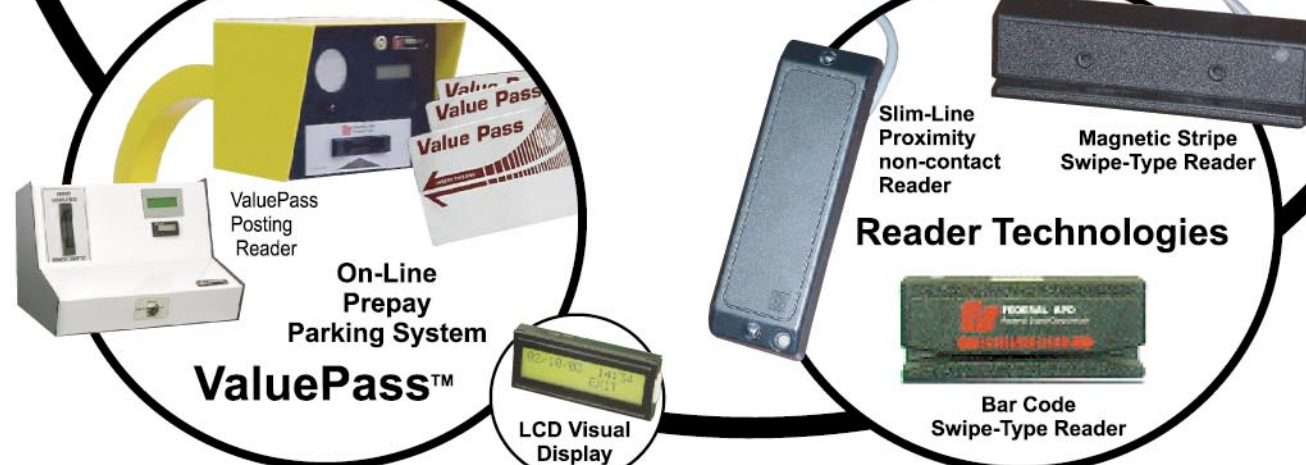

Interface with ScanNet® Central Parking Management Software

## Featured Benefits:

- Holidays: Program up to 16 Holidays.
- ID Status: Over 100,000 are available. Select cards with a valid or void status to grant or deny access.
- Issue Levels: Reuse your cards and reissue them using the same ID number. Up to 16 issue levels available.
- Privilege ID: Master ID overrides the system.
- Inputs: Monitor action using the input signal. Four inputs are available-Monitor, Inhibit, Egress and Link.
- Vends/Outputs: Outputs send signals from the reader to locking devices or security alarm contacts. Two outputs are available.

## Reader Technologies

## The Brain (Controller):

It starts and ends with the brains of the outfit. We provide all the functionality necessary to keep your customers happy, with an innovative product design that provides you with fast and easy access.
